

One button between a home problem and a trusted professional.

A managed home-maintenance marketplace built around one outcome: less uncertainty, faster resolution, and service people can trust.

MECHANICAL

ELECTRICAL

PLUMBING

CIVIL

STAKEHOLDER OVERVIEW

**PROBLEM → TECHNICIAN → FIXED**

Home maintenance starts with uncertainty.

When something breaks, customers become coordinators—searching, calling, negotiating, and hoping.

TRADITIONAL

WITH 7ADDAK

FRICTION

Multiple calls, uncertain availability, and endless coordination.

PRICE ANXIETY

Unclear scope and informal negotiation create doubt before work begins.

TRUST RISK

Unknown quality, inconsistent service, and little recourse if things go wrong.

From “what’s happening?” to handled.

Customers describe symptoms in plain language. 7addak orchestrates everything that follows.

NO TECHNICAL KNOWLEDGE REQUIRED

Better for the home. Better for the professional.

7addak removes coordination friction for customers and demand-generation friction for technicians.

Trust is not a feature. It is the product.

7addak is a managed marketplace—not an open directory of names and phone numbers.

“7addak is selling trust,
not plumbing.”

OPEN DIRECTORY

A list of options

7ADDAK

An accountable
experience

Review. Match. Monitor. Support.

Every layer reduces uncertainty before, during, and after the visit.

Clarity before commitment.

Use the right pricing model for the job—without asking the customer to gamble on an unknown total.

FIXED PRICE

**Known service.
Known price.**

For predictable work such as installation or routine maintenance.

PRICE SHOWN BEFORE BOOKING 

Confidence comes from knowing the commitment upfront.

DIAGNOSIS + QUOTATION

Unknown repair. Transparent decision.

 **1** **DIAGNOSE**

APPROVE

DECLINE

No quote-dependent work begins before customer approval.

Convenience on the surface. Control underneath.

7addak owns the service workflow between the customer's need and the technician's work.

Technology creates convenience. Operations create reliability.

Earn when the job is completed.

The intended commercial flow aligns platform revenue with a delivered service outcome.

PRIMARY ENGINE

Commission or platform share on completed jobs.

No percentage assumed.

FUTURE OPPORTUNITIES

Maintenance plans

Technician subscriptions

Corporate accounts

Preventive maintenance

Priority services

More service categories

Clearly staged as future options—not launch assumptions.

Win one zone before expanding the map.

Fast response comes from density—not from launching everywhere at once.

CONTROLLED LAUNCH

DEMAND DENSITY + TECHNICIAN DENSITY = FAST RESPONSE

NORTH STAR

TIME TO RESOLUTION

“I have a problem.” → “Problem solved.”

- Match time
- Technician ETA
- Acceptance rate
- Cancellation rate
- Average job value
- Jobs / technician
- Customer rating
- Technician rating
- Repeat customers
- First-time fix
- Complaint rate
- Platform commission
- Technician utilization

A home problem should feel solvable from the first tap.
