Why teams choose Supplify

Your next step

Supplify — Customer Overview

For: Restaurant owners, supplier leadership, and operations teams

Purpose: Understand what Supplify delivers — and why teams choose it over fragmented tools.

The idea

Food service runs on relationships — but relationships break down when **orders, deliveries, and invoices live in different places**.

Supplify is the **connected platform** where restaurants and suppliers work from the **same facts**: what was ordered, what was shipped, what arrived, and what is owed.

Supplify in one line: *From catalog to cash — one reliable flow for restaurants and their suppliers.*

For restaurants

Order from every connected supplier, track delivery, receive fairly, and reconcile invoices without spreadsheet chaos.

For suppliers

Centralize orders, run fulfillment and drivers, grow your customer base, and get paid with full context.

For operations

Warehouses, dispatch boards, proof of delivery, and inventory — built for how F&B actually works.

For growth

Deals, public catalogs, quote requests, and referrals — turn relationships into repeatable revenue.

Why the status quo fails

Today's pain	The cost to your business
Orders by phone and text	No shared record — disputes become “he said / she said”
Delivery is a black box	Kitchens can’t plan; suppliers get blamed unfairly
Receiving is rushed	Shortages found days later, when resolution is harder
Invoices don’t match delivery	Finance loses hours reconciling every week
Many suppliers, many systems	Staff re-learn a different process for each partner

Supplify replaces fragmentation with one auditable thread — from the first click to the final payment.

Everyone in the ecosystem — connected

Syntax error in text

mermaid version 10.9.6

Who	What they gain
Restaurant owners & managers	Visibility across suppliers, spend, and operations
Purchasing staff	One place to order — quick lists, deals, chat
Receiving teams	Structured receiving with quality notes and disputes
Supplier sales	Digital catalog, promotions, and customer growth tools
Warehouse & dispatch	Board, routes, drivers, proof of delivery
Drivers	Focused mobile-friendly delivery workspace
Finance (both sides)	Invoices tied to real orders and receiving reports
Guests <i>(optional)</i>	Public reservations and consumer ordering

Each person sees **only what their role requires** — secure, simple, accountable.

Restaurants — order with confidence

Discover & purchase

- Browse **connected supplier catalogs** in one workspace
- Build a cart across **multiple suppliers** in a single session
- Save **quick lists** for weekly staples; schedule automatic reorders
- Apply **deals and promotions** at checkout

Track & receive

- **Live order status** — placed, confirmed, shipped, delivered
- Optional **GPS tracking** when your supplier dispatches drivers
- **Receiving workflow** at the door — quantities, quality, photos
- Fair **disputes and credit notes** when something isn't right

Run the operation

- **Inventory** with expiry awareness for critical SKUs
 - **Reorder assistance** as your plan scales (patterns → forecasts)
 - **Invoices and payments** linked to what you actually received
 - **Reservations** and **staff tools** for front-of-house teams
-

Suppliers — fulfill without friction

Win & retain customers

- Rich **product catalog** with images and bulk import
- **Public mini-store** so new restaurants can discover you
- **Promotions and deals** your buyers will actually see
- **Growth program** — import prospects, referrals, sponsorships

Operate at scale

- Central **order inbox** — accept, decline, or amend with reasons
- **Calendar** of upcoming deliveries
- **Warehouse stock** and multi-location fulfillment
- **Dispatch board** — assign drivers, plan routes, capture proof of delivery

Get paid with clarity

- **Invoices from fulfilled orders** — less manual billing
 - Payment recording and **receivables** visibility
 - **Chat** next to orders — resolve questions in context
-

How an order flows — both sides, same truth

Step	Restaurant sees	Supplier sees
1 · Order	Catalog, cart, confirmation	Instant notification
2 · Confirm	Acceptance or proposed changes	Accept, decline, or amend
3 · Fulfill	Status updates	Pick, pack, assign driver
4 · Deliver	Optional live tracking	Driver status & proof
5 · Receive	Receiving report	Full delivery record
6 · Invoice	Invoice to review & pay	Receivable recorded

When things change — shortages, substitutions, quality issues — amendments and disputes stay **on the same order thread**. No lost emails. No mystery.

Everything you need — one platform

Capability	Restaurant	Supplier

Reports & insights	✓	✓
Team roles & permissions	✓	✓

Available capabilities depend on your subscription plan.

Plans that grow with your business

Start with a **Free Trial** to validate fit with your real suppliers and workflows. Scale into paid tiers as volume, users, and locations grow.

Plan	Ideal for	What you unlock
Free Trial	Evaluation	Core ordering, receiving, and collaboration — time-limited
Silver	Single location getting serious	Higher limits, reports, calendar, warehouses
Gold	Daily multi-supplier operations	Drivers, smart reorder, branches, advanced team roles
Platinum	Multi-site & data-led teams	AI-assisted reorder, deepest analytics, highest limits

Restaurants and suppliers each choose the tier that matches their side of the relationship. Your Supplify contact will recommend a starting point based on branches, users, and order volume.

Built for trust

Commitment	What it means for you
Secure access	Modern sign-in; each organization has its own isolated workspace
Role-based permissions	Owners, managers, purchasers, drivers, and accountants see only what they need
Complete audit trail	Orders, status changes, receiving, and invoices are recorded
Reliable infrastructure	Cloud-hosted, designed for uptime and secure file handling
Fair dispute resolution	Evidence stays attached to the order — not buried in chat

Your operational and financial data deserves the same rigor you bring to the kitchen and the warehouse.

Go live in weeks — not months

Phase	What happens
Week 1 · Setup	Account, profile, team invites, plan selection
Week 2 · Connect	Link trading partners; publish or browse catalogs; test order
Week 3 · Operate	Real orders through delivery, receiving, and invoicing

Most teams run production workflows within **two to three weeks**. Your Supplify onboarding lead provides checklists, training, and go-live support.

Why teams choose Supplify

One platform	Replace phone orders, spreadsheets, and disconnected tools
Shared truth	Restaurant and supplier always see the same order state
Faster resolution	Amendments and disputes with full context
Built for F&B	Not generic ERP — reservations, expiry, supplier relationships
Scales with you	From single location to multi-branch networks

Your next step

1. **Book a demo** — We walk through *your* scenario: restaurant, supplier, or both.
2. **Start a Free Trial** — Place real orders with your trading partners.
3. **Go live** — We support onboarding, training, and success reviews.

Speak with your Supplify representative for pricing, trial access, and a rollout plan tailored to your operation.
